

RECORDING SOFTWARE

iSS-04/09/16/36/72i

Video

- Up to 72Ch H.264/MPEG-4/M-JPEG compression
- Each channel individually customisable; frame rate up to 30/25fps, resolution up to mega pixels (ex. 1.3-5M etc.)

Audio

- Up to 72 channels of audio recording
- Bi-directional audio streaming support
- Audio Broadcast/ Chat

Display

- Simultaneous 72Ch, in 1, 4, 9, 16, 36 split-view, full screen, event pop-up, sequencing, hiding
- Multi-digital monitor support and operation
- On-screen digital zoom, I/O & PTZ interfaces
- Higher Screen Resolution (1920x1080, 1366x768, 1680x1050, 1600x900, 1440x900, 1920x1200, 1600x1200 etc.)
- Drag-and Drop support for cameras on 2 Windows viewer
- Windows lockup

Video Content Analytics

- Multi-sensitivity video motion detection, up to 3 customizable zones per channel
- Smart search mega-event screening

Recording

- Multi-methods include continuous, user-specified schedule, video analytics, alarm triggering
- Pre/post-event record buffering (1-60 Sec.)
- Privacy black-out
- On-Screen emergency manual recording

Playback

- Multi-type of events at multiple playback speeds
- SD card file directly playback (for cameras that can support SD card model)
- Synchronized audio and video for both live and playback modes
- AVI file export, playable wit third-party players
- Max. 16 channels synchronized playback
- Playback Mode: Play/ Pause/ Stop/ Reverse Play, Different Speed Control etc.
- Image Filter (Brightness, Contrast, Smooth, Sharpness, Hue, Saturation etc.)

Search

- Day/Time Search
- Event Search
- Smart Search (ex. Missing object, Foreign object)

Backup

- Multi-channel data export as AVI or JPEG

Storage

- Unlimited or multi-file recording database
- HDD management
- Automatically estimate HDD recording capacity
- Manual setting HDD's re-write

Remote Accessibility

- Remote Web Browser: Clients can be able to watch live real-time image via IE
- Remote Program: User can be able to remotely View Live Video, Setting and Playback
- Remote Lite Program: Live view function
- Remote 3GPP: Users to log in and view cameras that are connecting to it with 3GPP supported mobile phone

IVA (Intelligence Video Analytics)

- Missing Object Detection: Detect Missing Object via video
- Foreign Object Detection: Detect New Object via video
- Camera Occlusion: Detect Camera blockage
- Camera Defocus: Detect out of focus camera
- Camera Redirection: Detect camera position re-directing
- People Counting: Directional or Non-Directional People Counting

System Integration

- Various 3rd-party PTZ protocols support
- As many digital I/O from IP devices
- Smart Building e-map solution
- Log management (ex. TXT or EXCEL)
- HDD space management
- Friendly Configure Tool: Monitor resolution, Enable / Disable "Windows Control", "Ping", "Overlay" and Backup configurations

Reliability

- E-mail notification of event triggering
- Keyboard lock, auto reboot & auto logout
- Profile management
- Multi-user group authentication management
- Access Control (Black or White IP address list management)

Language

- Multi-Language Support (ex. English, Japanese, Danish, French, German, Italian, Polish, Portuguese, Russia, Spanish)

3rd-Party Camera Support

Support 35 brands of IP cameras
